

**PERSONAL CARE ABSORBENT ARTICLE HAVING SPLICED ABSORBENT
MATERIAL**

ABSTRACT OF THE DISCLOSURE

A personal care absorbent article including spliced absorbent material. The absorbent material has a first portion of absorbent material spliced to a second portion of absorbent material to form a longer, continuous length of absorbent material suitable for uninterrupted sequential infeed to a processing machine. A trailing end of the first portion is adjacent a leading end of the second portion. A piece of splicing material is attached to the ends. The piece of splicing material has a fluid permeability at least about as great as a fluid permeability of the first portion of absorbent material and at least about as great as a fluid permeability of the second portion of absorbent material.
